Forecast for Tuesday 26 Jul 2022

Weather: Rather cloudy across Snowdonia during the early hours of Tuesday morning, perhaps with an outside chance of an odd light shower. The cloud clearing eastwards during the morning, leaving the area with sunny spells throughout the morning and into the afternoon, with an outside risk of an isolated light shower. A bright end to the day with clearing skies across the park.

Chance of cloud-free hill tops above 800m: 50% rising to 70% from early morning and then towards 85% from mid-afternoon.

Low Cloud and visibility: A cloudy start to the day with extensive cloud cover over the east of the park, as a result cloud bases initially close to 500-600m but as the cloud clears, cloud bases will generally lift above the level of the summits from mid to late morning. Visibilities generally excellent outside of any cloud with temporal deterioration in association to any showers.

Valley	12/10	12/10	12/10	13/12	14/13	15/14	15/13	13/12	12/12
Freezing Level*	2100m	1900m	1700m	1700m	1700m	1700m	1600m	1700m	1800m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Generally a fine day after the clearance of early cloud, with decent sunny spells developing, however with strong sunshine and high UV levels skin protection will be needed if spending time on the mountains. Cloud cover early morning may make navigation more challenging.

Forecast for Wednesday 27 Jul 2022

Weather: Fine and mostly dry across the park during the morning, perhaps with an isolated shower. High and medium level cloud will increase from the south and west during the afternoon leaving Snowdonia under cloudier but bright skies by the end of the day.

Maximum wind: Variable winds 10-15 mph with isolated gusts to 20 mph

Chance of cloud-free hill tops above 800m: 90%

Low Cloud and visibility: Cloud bases well above the level of summits throughout the day. Good to excellent visibilities with distant hills fairly reliably visible throughout the day.

Temperature: **Valleys:** Plus 8 Celsius becoming plus 21 Celsius.
At 800m: Plus 6 Celsius becoming plus 12 Celsius.
Freezing level: Well above the summits.
